

RED OAK

SCIENTIFIC NAME: *Quercus rubra*

DISTRIBUTION AND AVAILABILITY

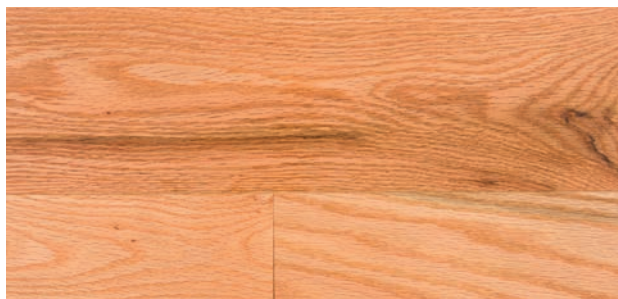

- Northeastern United States
- Southeastern Canada
- Readily Available

COLOR:

*Range Variation*

Heartwood is a light to medium brown, commonly with a reddish cast. Paler sapwood is not always sharply demarcated from the heartwood. Quarter cut sections display prominent ray fleck patterns. Rift cutting reduces ray fleck significantly. White oak (*Quercus alba*) tends to have a slightly more olive cast (as opposed to red), but color alone isn't always a reliable method of determining the type of oak.

DISCLAIMER

A single sample may not accurately represent the full range of natural variations to be expected. Due to the inherent properties and characteristics of wood, these samples should be viewed as an approximation of what can be obtained. Some wood species have more natural variance in appearance than others. We have made every effort to make colors as accurate as possible. Colors on screen may vary depending on your screen setting and resolution.

# LINEA

## Species Overview

### RED OAK INFORMATION

		44lbs/ft <sup>3</sup> (700 kg/m <sup>3</sup> )
<b>AVERAGE DRIED WEIGHT</b>		
	GRAIN   TEXTURE	Grain is straight, with a coarse, uneven texture. End grain is very porous
	PRICING   AVAILABILITY	Moderate. Rift Cut available at a premium. <i>Readily Available</i>
	COVERED EXTERIOR RATING	<b>Poor</b>   Good   Excellent
	PHOTOSENSITIVITY	High   <b>Moderate</b>   Low
	CONSERVATION STATUS	LC - Least Concern (IUCN 3.1) G5 - Secure (NatureServe)
	VENEER OPTIONS	Flat Cut   Quarter Cut   Rift Cut
