

WHITE OAK

SCIENTIFIC NAME: *Quercus alba*

DISTRIBUTION AND AVAILABILITY

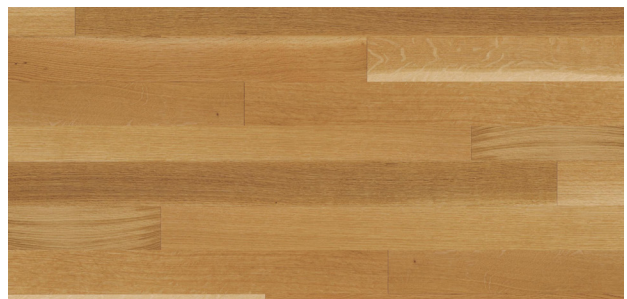

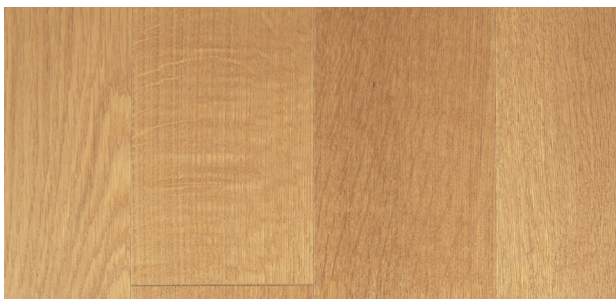

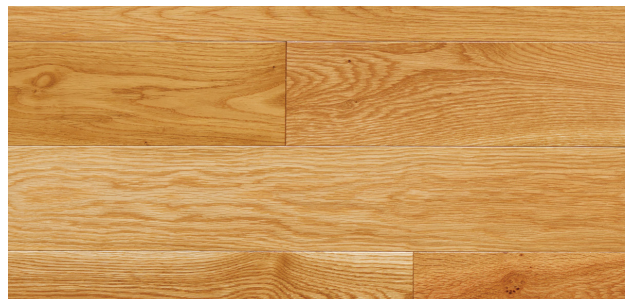

- Eastern and Central North America
- Readily Available

COLOR:

Range Variation

Heartwood is a light to medium brown, commonly with an olive cast. Paler sapwood is not always sharply demarcated from the heartwood. Quartersawn sections display prominent ray fleck patterns. Rift cutting reduces ray fleck significantly. Red oak (*Quercus rubra*) tends to have a slightly redder cast (as opposed to olive), but color alone isn't always a reliable method of determining the type of oak.

DISCLAIMER

A single sample may not accurately represent the full range of natural variations to be expected. Due to the inherent properties and characteristics of wood, these samples should be viewed as an approximation of what can be obtained. Some wood species have more natural variance in appearance than others. We have made every effort to make colors as accurate as possible. Colors on screen may vary depending on your screen setting and resolution.

WHITE OAK INFORMATION

AVERAGE DRIED WEIGHT		47 lbs/ft ³ (755 kg/m ³)
	GRAIN TEXTURE	Grain is straight, with a coarse, uneven texture.
	PRICING AVAILABILITY	Moderate to Premium. Rift Cut available at a premium. <i>Readily Available</i>
	COVERED EXTERIOR RATING	Poor Good Excellent
	PHOTOSENSITIVITY	High Moderate Low
	CONSERVATION STATUS	LC - Least Concern (IUCN 3.1)
	VENEER OPTIONS	Rift Cut Flat Cut Quarter Cut
